## Projects we can fund

### **5. Sudbury Cycles Kids Bike Exchange \$399.31 359 VOTES**

We are Sudbury Cycles and we want support for year 5 of our bike exchange where kids can trade in the bike they've outgrown for a rehabilitated bike of the right size (or pick up their first bike in exchange for a donation), and get fitted with a free helmet. We also hope to hold a bike give away for kids in need, as we did last year.

### **9. Flour Mill Community Farm Orchard \$500 340 VOTES**

We are the Flour Mill Community Food Centre and we would like to plant a small orchard near O'Connor Park with fruit trees and berries. This will bring attention and community interest in food security and how those who live in poverty can access good healthy nutritious food, and will be the first piece of a larger project, the Flour Mill Community Farm.

### **1. Laurentian University School of the Environment Living Wall \$500 338 VOTES**

We are a group of Laurentian University School of the Environment students and we want to build a living wall on campus that all students, faculty, staff and the City of Greater Sudbury community can enjoy. This living wall of plants will bring, year round, natural aesthetic appeal and bring nature closer to the students of Laurentian University and the community of Sudbury.

### **3. Chargers Growth and Re-greening Program \$350 322 VOTES**

We are Confederation Secondary School and we want to build small greenhouses with our students to grow and plant trees to continue to re-green Greater Sudbury. The best part about the program is that it offers relevant research for students while making a direct and positive impact on our local environment.

### **6. Safe Walking Routes for Community Members \$100 297 VOTES**

I am a Social Worker Placement Student at Better Beginning, Better Futures and I want to create safe and accessible walking routes to schools for kids and families in the Bruce Avenue/Cambrian Heights area.

### **10. Our Children Our Future Gardens-Minnow Lake Place \$500 291 VOTES**

We are Our Children Our Future and we want to create 25 new community garden beds, including at least 2 accessible beds, at Minnow Lake Place. With participating families and kids, we will grow food and incorporate our gardens with our Collective Cooking program, which enhances the participants' skills in planning and cooking nutritious meals on a budget.

#### **4. Junction Creek Butternut Grove \$450 290 VOTES**

We are residents (and neighbourhood volunteer re-foresters) and we would like to create a Butternut Tree Grove adjacent to Junction Creek in Garson. Our intent is to create a unique arboretum within our neighborhood to be enjoyed by the community and as celebration of our communities concern for the environment and bio-diversity.

#### **8. Operation Fruit Snacks \$500 269 VOTES**

We are Fruit for All and we want to turn surplus residential fruit into dried fruit snacks for school breakfast programs. The aim of this pilot project is to produce 1,000 bags of dehydrated rhubarb snacks and/or apple chips, providing local, nutritious snacks to 1,000 school children in Sudbury.

#### **2. Microhatchery \$500 245 VOTES**

We are Algonquin Road Public School and we would like support for our School-Based, Self-Contained, Micro-Hatchery. The Micro-Hatchery involves students from Kindergarten through to Grade 8 who care for and study Walleye and Brook Trout eggs and fry, which, when grown, stock two local lakes.

#### **13. NORCAT Community Garden Space 219 VOTES**

We are NORCAT and we want to install a small scale community garden on our property with both meditative and food producing components. It will be open to the community and to Cambrian students. Our focus would be growing new and unusual varieties that could have a potential for larger adoption. Produce will be donated to the community.

*NORCAT generously donated their funds to the next project in line (by number of votes): the Elm-West Playground Community Garden. NORCAT will continue with their project with their own resources.*

#### **11. Coniston Community Gardens \$500 208 VOTES**

We are the Coniston Community Gardens and we would like to add 15 beds with the bulk of the produce to be donated to the Coniston Food Bank, and install a composting system and rain barrels. Youth are very much involved in planting and maintenance of our gardens and this year we will be involving seniors as well.

#### **7. Young Naturalist Challenge Display for the Lake Laurentian Conservation Area \$252.94 195 VOTES**

We are the Nickel District Conservation Foundation and we want to install a Young Naturalist Challenge Display at the head of the Self-Guided Trail by the Lake Laurentian Nature Chalet. Through the challenges, youth and their families will be able to discover local plant and animal species along the trails, learn to identify them, find out fun facts about them, and gain an appreciation for their unique place in our local ecosystems.

#### **12. Elm-West Playground Community Garden \$480 176 VOTES**

We are the Elm-West Playground Association and we would like to introduce a community garden in our neighbourhood playground to provide opportunities for interactions and teachings amongst the young and older generation, and get more people to the playground and taking part in community events. Our neighbourhood could really use this opportunity to kick-start a community garden and kick-start some new friendship, while working together to make this garden grow.

## Other projects

### 14. Growing the Garden of Life **165 VOTES**

We are the Northern Ontario Railroad Museum and Heritage Centre and we want to expand the Garden of Life, originally constructed in 2011 to help raise awareness for the importance of organ and tissue donation. The garden has become a focal point for the museum and downtown Capreol, and the community and museum volunteers are eager to expand the garden and its message.

### 15. The Roots Project **133 VOTES**

I am resident of Greater Sudbury and I want to hang postcards with affirmative messages along some of our community's many nature paths. The aim of this project is bring a little magic and joy into the City, to get people to become more mindful of their environment, take notice in the small things in life, and to foster a healthy sense of self.

### 16. Community Art at Twin Forks Playground **104 VOTES**

We are the Ward 8 Community Action Network and the Twin Forks Playground Association and we want to create community art at the Twin Forks Community Garden in order to better engage neighbourhood children at the park and encourage more families to use the park.

### 17. African Doll-making Workshop and Exhibit of the Dolls – Atelier de fabrication de poupée africaine et exposition des poupées **97 VOTES**

We are the Centre de santé communautaire du Grand Sudbury and we want to host a 3-part workshop to strengthen community ties and assist with the integration of francophone African women living in Greater Sudbury, by providing the opportunity to learn a new skill, socialize with other women of African background, and learn about services that are available in Greater Sudbury. The dolls will then be exhibited at the next 'Dîner africain'.
